-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1755

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5057655.

Example of the reference teaches spray-drying a liquid comprising 16.8% lactulose and 13.3% protein and the feed additive produced therefrom. The reference does not disclose any chlorine in the composition and the lack of caking observed in the first paragraph of column 11 suggests less than 0.08 parts/part protein must be present. The dried product produced anticipates every instance of claim 4. Even as dependent upon claims 2 and 3, a product by process claim is considered on the basis of the product itself. No material difference is seen between the product of the reference and that of claim 4.

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. While the prior art teaches using ultrafiltration to alter the amount of protein present it does not address or recognize the importance of the protein to chlorine ratio. Without discovery of the importance thereof one of ordinary skill in the art would have no reason to modify the process of example 1 to alter said ratio. US Patent 5026430 is evidence of the lack of recognition of the importance of minimizing chlorine in the prior art.
